

# Disability inclusive & Disaster-resilient Queensland

## Disability-Inclusive Disaster Risk Reduction (DIDRR) Framework and Toolkit

*We are working with people with disability to make sure that everyone is ready and prepared for emergencies!*

Government, University, Disability, and Community groups are working together to make sure people with disability are included in disaster risk reduction.

We are working with people with disability, community organisations and emergency services to develop actions for Disability Inclusive Disaster Risk Reduction (DIDRR).

*DIDRR means making sure that the needs and voices of people with disability are included in emergency management and disaster planning.*

### This project has two phases:

*We developed the DIDRR Framework and Toolkit in Phase 1.*

*We will show how DIDRR works in Phase 2.*

### What is the DIDRR Framework and Toolkit?

The **DIDRR Framework and Toolkit** tells what people with disability can do to decrease their disaster risk.

It also shows what community, disability, and emergency services can do to make sure people with disability are included.

There is a Resource Library that can help people with disability to prepare for emergencies.

You can learn more about the DIDRR Framework and Toolkit here: <https://collaborating4inclusion.org/disability-inclusive-disaster-risk-reduction/>

## Why is it needed?

It is important for all people to prepare for emergencies.

People with disability want to prepare for emergencies but they need accessible tools to help them get ready.

Some people will need help from others to prepare for emergencies.

It is important that we all work together to make disaster risk reduction inclusive.

## What will happen in Phase Two?

Phase Two goes from October 2019 to June 2021

We will make sure people with disability are included by inviting them and making sure that they have support to participate.

In this project, we want to help people with disability to manage before, during and after an emergency.

We will give people information, skills and tools. We will co-design resources together with people with disability.

We will work together with people with disability to make sure that they have information and can use that information to make good decisions in an emergency.

We will make videos and tell stories about what we learn.

We will use pictures to tell those stories.

Some people are helping us. These people give us advice and help others to learn about the project.

People with disability also give us advice on how to make sure people with disability are included and represented.

## Where can I learn more?

### Project Lead:

A/Prof. Michelle Villeneuve  
Centre for Disability Research and Policy,  
The University of Sydney
