

Disability Inclusive Disaster Risk Reduction (DIDRR)

DIDRR requires actions of multiple stakeholders working together with people with disability to identify and remove barriers to the safety and well-being of people with disability before, during, and after disasters.

Person-Centred Emergency Preparedness (P-CEP) and Disability Inclusive Emergency Planning (DIEP) activate cross-sector collaboration to achieve DIDRR.

Some people will need additional support, resources or advocacy to prepare, respond, and recover from disasters.

Person-Centred Emergency Preparedness (P-CEP)

P-CEP activates capability-focused self-assessment and preparedness actions of multiple stakeholders to enable personal emergency preparedness tailored to individual support needs; resulting in the identification of and planning for unmet needs that increase disaster risks.

Disability Inclusive Emergency Planning (DIEP)

DIEP activates inclusive community-led preparedness actions of multiple stakeholders that focus on pre-planning for the extra support needs of people with disability in emergencies, and building community willingness and capability to share responsibility for the organisation and delivery of supports, so that nobody is left behind.
